

Prahlín Portfolio Work Log - July 31, 2026

Compiled summary for Friday, July 31, 2026 - focus: Alla Vostra flow chart visibility and local session recovery after repeated style iteration requests.

Source Materials Reviewed

- Studied all existing worklog inventories and naming/metadata patterns.
- Reviewed portfolio_worklog_july30.pdf as the latest historical style baseline.
- Re-scanned portfolio_PROJECT_SNAPSHOT.txt for current file list and source context.
- Rechecked active SVG source at public/images/alla-vostra-product-flow-mockup.svg.

Baseline Status Before July 31 Work

- Flow section-band dark overlays were already in a heavy reduction sequence.
- Local dev session existed with route checks being used for verification.
- User requested visible background-grid preservation across the portfolio flow canvas.

Goals for July 31

- Follow legacy worklog naming/metadata/structure exactly.
- Finalize darkest flow-band transparency as requested.
- Resolve session errors (localhost conflict) and confirm Alla Vostra remains healthy.
- Produce a July 31 PDF worklog in the same format as prior daily entries.

Work Completed - Worklog Review

- Confirmed complete worklog list with portfolio_worklog_*.pdf inventory.
- Confirmed prior-file metadata patterns included title, subject, author, creator, producer, and page-size defaults.

Work Completed - Flow Chart Treatment

- Updated '.section-band' styling through repeated requested opacity steps.
- Set final state to fully transparent fill/stroke so background grid now reads through sections.
- Preserved flow-row geometry, rails, node geometry, and arrow structure.

Work Completed - Local Stability

- Cleared '.next' dev cache and re-launched local Next workflow on 127.0.0.1:3000.
- Addressed stale process conflict and restored a clean 'npm run dev' session.
- Confirmed localhost '/' and '/projects/alla-vostra' route availability after recovery.

Files Touched

- public/images/alla-vostra-product-flow-mockup.svg
- Local '.next' cache lifecycle during the session.

Notes

- No unrelated UI feature changes were introduced in this follow-up cycle.
- No commit was made, keeping the existing commit-policy requirement intact.
