

## Prahl Portfolio Work Log - August 12, 2026 (Part 1)

Compiled summary for Wednesday, August 12, 2026 - Part 1 - focus: continuing the Prahl.dev Portfolio Alla Vostra UI Foundations Visual Hierarchy section after the August 11 Step 1b/1c/1d layer-isolation pass, cleaning the Step 1d cheeseboard source, removing the remaining Step 4 device-frame shell and transparent bands, matching stack-header placement and vertical breathing room across the Pre-Scrolling and On-Scrolling rows, scaling Step 3 to the accepted Step 1 large-stack size, adding Step 5 as a cropped mosaic detail under Step 4, adding a new During Shopping row with Step 6 using the Piccola products overlay screenshot, validating TypeScript, static export, and browser-rendered dimensions, refreshing the Portfolio project snapshot, reviewing all prior Portfolio PDF worklogs, and generating the August 12 Part 1 Portfolio PDF worklog.

Generated in continuity with the established Prahl Portfolio daily worklog cadence: compact opening summary, source-material section, baseline section, goal list, work-completed sections, validation section, files-touched list, follow-up context, and output-artifact close.

This artifact intentionally covers Prahl/portfolio work performed after portfolio\_worklog\_august11.pdf and after the August 11 documentation state. The source commit reviewed for this record is e219cef07 on main, matching origin/main before this PDF was generated. That commit contains the Visual Hierarchy source and asset work described here. No separate Hostinger production deployment command was run during this worklog-generation pass; the new local artifacts produced for this record are the refreshed project snapshot and this August 12 Part 1 PDF worklog.

### Source Materials Reviewed

- Ran ./read\_project.sh from /Users/prahlin/gh/portfolio and regenerated portfolio\_PROJECT\_SNAPSHOT.txt before writing this worklog, preserving the project convention that Codex refreshes the current source snapshot before continuing Portfolio documentation work.
- Reviewed the refreshed portfolio\_PROJECT\_SNAPSHOT.txt, including project notes, source tree, public image and font inventories, PDF worklog inventory, package and deployment configuration, git context, recent commits, and the standing instruction to ask for a commit message before committing or pushing.
- Reviewed every pre-existing Portfolio root-level worklog PDF: portfolio\_worklog\_july11.pdf, portfolio\_worklog\_july14.pdf, portfolio\_worklog\_july15\_part1.pdf, portfolio\_worklog\_july15\_part2.pdf, portfolio\_worklog\_july16.pdf, portfolio\_worklog\_july19.pdf, portfolio\_worklog\_july20.pdf, portfolio\_worklog\_july21.pdf, portfolio\_worklog\_july22.pdf, portfolio\_worklog\_july23.pdf, portfolio\_worklog\_july24.pdf, portfolio\_worklog\_july25.pdf, portfolio\_worklog\_july29.pdf, portfolio\_worklog\_july30.pdf, portfolio\_worklog\_july31.pdf, portfolio\_worklog\_august1\_part1.pdf, portfolio\_worklog\_august1\_part2.pdf, portfolio\_worklog\_august1\_part3.pdf, portfolio\_worklog\_august3.pdf, portfolio\_worklog\_august4.pdf, portfolio\_worklog\_august5.pdf, portfolio\_worklog\_august6.pdf, portfolio\_worklog\_august10\_part1.pdf, portfolio\_worklog\_august10\_part2.pdf, and portfolio\_worklog\_august11.pdf.
- Extracted text from all twenty-five existing Portfolio PDFs with pdftotext and checked recent metadata with pdftinfo to preserve title cadence, Part 1 naming, opening-summary density, section order, compact bullet-heavy technical voice, validation language, files-touched lists, follow-up context, output-artifact close, root-level filename style, letter-size pages, PDF 1.4 output, Codex author/creator/producer metadata, and Helvetica-style base-font convention.
- Used portfolio\_worklog\_august11.pdf as the closest structural baseline because it documented the immediately preceding Alla Vostra Visual Hierarchy layer-stack work, transparent no-frame focal assets, stack scaling, row-header placement, cache-clearing pattern, browser-measurement workflow, and documentation language.
- Reviewed git history and state through git log, git show --stat, git show --name-status, git status, git branch -vv, git diff --stat, git diff --name-status, git diff --check, file, and source-specific searches. HEAD and origin/main resolved to e219cef before this PDF was generated.
- Reviewed app/projects/alla-vostra/ProductFlowSwitcher.tsx, app/globals.css, next-env.d.ts, public/images/alla-vostra/cheeseboard\_products.png, public/images/alla-vostra/cheeseboard\_products\_clean.png, the generated Step 4 and Step 5 home-screen derivatives, public/images/products\_overlay\_piccola\_large.png, the matching Alla Vostra raw

Android\_Large/products\_overlay.png, package scripts, and the local /projects/alla-vostra route.

#### Baseline Status Before August 12 Part 1 Work

- August 11 had already expanded the Visual Hierarchy section into a layered pre-scrolling explanation with Step 1, Step 1b, Step 2, Step 1c, Step 1d, Step 3, and Step 4 visible without a category-specific Show More break.
- Step 1 was the accepted full-size large device stack, while the surrounding explanatory stacks used a mixture of 50 percent scale and transparent no-frame focal crops.
- Step 1d still needed a cleaner cheeseboard source. The portfolio copy of cheeseboard\_products.png matched the Alla Vostra repo source, but the source alpha carried tiny dark or transparent pinholes that became visible on the dark gridded Portfolio background.
- Step 4 still needed to become a no-device-frame home-screen artifact with its grayed top and orange bottom banner made fully transparent and then physically cropped so the old transparent zones did not reserve vertical layout space.
- The Pre-Scrolling and On-Scrolling row labels, Step headers, and screenshot/device-frame stack gaps needed to be harmonized after the extra Step 1b/1c/1d right-column stacks and the large Step 1 treatment changed the optical rhythm.
- Step 3 still rendered at the smaller Visual Hierarchy scale from the August 10/11 comparison pass, but the user wanted the full On-Scrolling home-screen stack scaled up to match Step 1 exactly.
- The user wanted a new Step 5 below Step 4 that reused the Step 4 home-screen mosaic image but removed the lower cream/text/cart area through transparency and later through a true alpha-bound crop.
- The Visual Hierarchy section did not yet include a third row for active shopping. A Piccola products overlay screenshot existed in both the portfolio public images and the Alla Vostra repo raw Play Store screenshot folder, but it had not yet been wired into the UI Foundations walkthrough.

#### Goals for August 12 Part 1

- Clean the Step 1d cheeseboard visual so the board uses the exact Alla Vostra cheeseboard product image while eliminating dark pinholes and transparent speckles that read as black dots in the Portfolio grid.
- Convert Step 4 from a framed or partially framed home-screen treatment into a no-frame screenshot with transparent top and bottom regions, then crop away the fully transparent zones while leaving Step 4 otherwise intact after user approval.
- Normalize header vertical placement and screenshot/device-frame stack gaps across Step 1b, Step 1c, Step 1d, Step 3, Step 4, and the row headers so the Visual Hierarchy section reads as one system.
- Scale Step 3 to the same full visual size as Step 1 without accidentally changing Step 4 after the user explicitly said not to touch Step 4 further.
- Add Step 5 below Step 4 in the right column, based on the Step 4 image, while making everything after the cutting-board/salami mosaic region transparent and then cropping the transparent area out of the asset bounds.
- Add a new DURING SHOPPING section label below PRE-SCROLLING and ON-SCROLLING, then place Step 6 as a large left-column stack using the Piccola products overlay during the shopping process.
- Keep browser validation grounded in the actual UI Foundations view on <http://127.0.0.1:3000/projects/alla-vostra>, including cache resets when Turbopack serves stale CSS or stale image output.

#### Work Completed - Context, Source Review, and Cache Handling

- Began by running the Portfolio project reader and reviewing the existing project snapshot and root-level Portfolio worklogs so the Visual Hierarchy edits stayed aligned with the established UI Foundations documentation style.
- Confirmed the Alla Vostra page defaults to UX Product Flow, so every browser measurement had to click the UI Foundations tab before querying the Visual Hierarchy group.

- Kept the local Next.js development server available at <http://127.0.0.1:3000> for user

inspection, restarting it when stale CSS bundles omitted new selectors or when Next image optimization continued to show older asset variants.

- Cleared the development cache by moving .next aside into ignored stale-cache folders when ordinary browser refreshes still served outdated CSS or old optimized image results.
- Used Playwright repeatedly to switch to UI Foundations, locate Step stacks by visible header text, measure zoom, frame width, frame height, header-to-frame gaps, label placement, grid rows, and active image sources, and capture temporary verification screenshots.

#### Work Completed - Step 1d Cheeseboard Cleanup

- Compared public/images/alla-vostra/cheeseboard\_products.png with the Alla Vostra repo source and confirmed the source image was the intended exact cheeseboard product image even though its alpha holes produced visible black-dot artifacts on the dark Portfolio background.
- Generated public/images/alla-vostra/cheeseboard\_products\_clean.png at the original 405 x 250 size, filling the pinholes and preserving the cheeseboard shape, scale, and product pixels for the Step 1d layer.
- Extended PlaceholderScreen with an imageUnoptimized prop so transparent source images that must render exactly can bypass Next image optimization when needed.
- Rewired Step 1d to use /images/alla-vostra/cheeseboard\_products\_clean.png, gave it the more accurate 405 / 250 aspect ratio, updated the alt text to identify the cheeseboard product image, and left the rest of the Step 1b/1c/1d layout intact.
- Rechecked the local page after the user reported the image was unchanged at port 3000, confirming that stale dev output rather than missing source edits could keep the old dotted board visible until cache refresh.

#### Work Completed - Step 4 No-Frame and Transparent Crop

- Removed the device-frame encasing from the Step 4 home-screen screenshot by deriving a no-frame home-screen PNG from home\_screen\_large.png rather than continuing to use the framed muted asset from the earlier Visual Hierarchy pass.
- Generated public/images/alla-vostra-home-toolbar-bottom-transparent-no-frame.png at 1440 x 3120 with the old grayed top region and orange bottom banner made fully transparent.
- Cropped the fully transparent top and bottom zones into public/images/alla-vostra-home-toolbar-bottom-transparent-no-frame-cropped.png at 1440 x 2713, preserving the visible home-screen mosaic/content pixels while removing transparent canvas rows.
- Rewired Step 4 to the cropped no-frame PNG, updated its aspect ratio to 1440 / 2713, and marked the image unoptimized so the transparent no-frame asset renders as authored.
- Preserved Step 4 after the user later said not to touch Step 4, treating that instruction as a boundary against further Step 4 edits rather than a request to revert the already accepted no-frame/crop work.

#### Work Completed - Row Spacing, Headers, and Step 3 Scaling

- Added a Visual-Hierarchy-specific row-label stack gap variable and increased the grid top padding so PRE-SCROLLING has more breathing room below the category copy and above the first row of stacks.
- Matched Step 1b header vertical placement to Step 1 and normalized Step-header-to-screenshot/frame gaps across the other Visual Hierarchy stack siblings.
- Added the ON-SCROLLING row label above the Step 3/4 stack row with the same approximate 24px breathing room used for PRE-SCROLLING.
- Scaled Step 3 to full size by grouping it with Step 1 for zoom, h4 font size, h4 margin, brace/frame-pair gap, external annotation sizing, section-line widths, and section-label font sizing.
- Measured the browser-rendered Step 1 and Step 3 stacks after the cache refresh and confirmed both rendered at zoom 1, 432px stack width, 720.8px stack height, 15px header font, 14px header-to-frame gap, 432px frame width, 688.8px frame height, 28px external annotation font, 24px section-line width, and 10px section-label font.
- Confirmed Step 4 remained at the smaller 0.5 scale while Step 3 adopted the large Step 1 scale, satisfying the user request without changing Step 4 during that pass.

#### Work Completed - Step 5 Mosaic Detail Stack

- Added Step 5 to the Visual Hierarchy step list and placed it directly below Step 4 in the right column, while Step 3 spans the combined Step 4 and Step 5 rows on the left.
- Built public/images/alla-vostra-home-mosaic-transparent-after-polygons.png from the Step 4 cropped no-frame home-screen image, initially making the area below the fully cream section transparent, then iterating the cutoff after user review.
- Moved the Step 5 transparency cutoff upward to the cutting-board edge, then corrected the over-clipped version so no dark-brown shards or salami pixels were removed.
- Settled the final Step 5 alpha cutoff below the preserved dark-brown board and salami edge, with row 1279 opaque and row 1280 onward transparent before cropping.
- Cropped Step 5 transparent region out of the file itself, changing the asset from 1440 x 2713 to 1440 x 1280 and updating the Step 5 frame ratio to 1440 / 1280 so the browser no longer reserved the old dead transparent height.
- Added Step 5-specific callout percentages after the crop so TOOLBAR, NAV BAR, MAIN CONTENT, and SHOPPING CART labels remained readable in the shorter frame and no longer collided.

#### Work Completed - Step 6 During Shopping Stack

- Added a third Visual Hierarchy row label, DURING SHOPPING, below the existing PRE-SCROLLING and ON-SCROLLING labels.
- Located the requested Piccola shopping screenshot in the portfolio repo as public/images/products\_overlay\_piccola\_large.png and confirmed it is byte-identical to /Users/prahlin/gh/alla\_vostra/docs/play-store/screenshots/raw/Android\_Large/products\_overlay.png.
- Added Step 6 to the Visual Hierarchy visible step list and wired it to /images/products\_overlay\_piccola\_large.png with alt text identifying the Alla Vostra Piccola products overlay.
- Extended PlaceholderScreen with a showScreenLabel option so Step 6 can be a clean large screenshot stack without an extra green Large label above the device image.
- Placed Step 6 in the left column below the On-Scrolling row and forced its figure and stack width to 318px so it renders as a true large stack rather than shrinking to the intrinsic narrow tall-phone width.
- Tuned the DURING SHOPPING label placement so it sits above the Step 6 header with approximately the same 24px breathing room used by the earlier row labels.

#### Work Completed - Validation, Commit Message, and Documentation Context

- Ran npm run check multiple times during the August 12 source work and during this PDF-generation pass, confirming TypeScript passed with tsc --noEmit.
- Ran npm run build:static and confirmed Next.js 16.2.10 completed the static export for /, /articles, /projects/alla-vostra, and /projects/cinerific after the Visual Hierarchy changes.
- Ran git diff --check against the edited source files and generated asset paths during the source pass, confirming no whitespace errors in the relevant source diff.
- Captured Playwright screenshots for Step 3 full-size comparison, Step 5 before and after cropping, and the final Step 6 During Shopping row.
- Recommended the user-requested commit message in one-header plus hyphen-line format, covering cleaned Visual Hierarchy assets, Step 1/3/6 large-stack alignment, Step 5 cropped mosaic treatment, and the new During Shopping row.
- The source work was committed as e219cef, Refined Alla Vostra visual hierarchy walkthrough, with ProductFlowSwitcher, globals.css, next-env.d.ts, the cleaned cheeseboard image, Step 4 no-frame crops, Step 5 cropped mosaic asset, and a refreshed snapshot included.

#### Validation Summary

- npm run check passed with tsc --noEmit during the August 12 source pass and again during this August 12 Part 1 PDF-generation pass.
- npm run build:static passed during the August 12 source pass, generating a successful static export for the Portfolio routes including /projects/alla-vostra.
- Playwright confirmed the Alla Vostra page can switch to UI Foundations and expose the Visual Hierarchy group containing Step 1, Step 1b, Step 2, Step 1c, Step 1d, Step 3, Step 4, Step 5,

and Step 6.

- Browser measurements confirmed Step 1 and Step 3 render as matching large stacks after the Step 3 scale-up, while Step 4 remains at the smaller right-column scale.
- Browser measurements confirmed Step 5 renders below Step 4 in the right column, uses /images/alla-vostra-home-mosaic-transparent-after-polygons.png, and uses the cropped 1440 / 1280 ratio without retaining the earlier transparent 2713px height.
- Browser measurements confirmed Step 6 renders in the left column under DURING SHOPPING, uses /images/products\_overlay\_piccola\_large.png, sits at zoom 1, uses a 318px frame width, and preserves the 14px header-to-frame gap.
- Asset inspection confirmed cheeseboard\_products\_clean.png is 405 x 250, Step 4 cropped no-frame is 1440 x 2713, Step 5 cropped mosaic is 1440 x 1280, and the Piccola products overlay source is 1440 x 3120.
- git branch -vv confirmed main and origin/main both pointed at e219cef before this PDF was generated.

#### Files Touched

- app/projects/alla-vostra/ProductFlowSwitcher.tsx - added imageUnoptimized and showScreenLabel controls to PlaceholderScreen; rewired Step 1d to the cleaned cheeseboard asset; wired Step 4 to the cropped no-frame home-screen asset; added Step 5 with a cropped mosaic image and Step-specific callouts; added Step 6 with the Piccola products overlay; added DURING SHOPPING to the Visual Hierarchy row labels; and raised the Visual Hierarchy visible step limit to nine.
- app/globals.css - increased Visual Hierarchy row-label breathing room; normalized Step header and stack gaps; scaled Step 3 to match Step 1; positioned Step 4 and Step 5 in the right-column On-Scrolling stack; placed Step 6 in the new During Shopping row; forced Step 6 to the 318px large-stack width; and added row-label placement for DURING SHOPPING.
- next-env.d.ts - reflected the active Next.js development route-type import after the cache/build refresh cycle.
- public/images/alla-vostra/cheeseboard\_products\_clean.png - added the cleaned 405 x 250 cheeseboard product cutout used by Step 1d to remove visible pinholes and black-dot artifacts.
- public/images/alla-vostra-home-toolbar-bottom-transparent-no-frame.png - added the full 1440 x 3120 no-frame Step 4 source derivative with top and bottom bands made transparent.
- public/images/alla-vostra-home-toolbar-bottom-transparent-no-frame-cropped.png - added the 1440 x 2713 cropped Step 4 no-frame asset with fully transparent top and bottom zones removed.
- public/images/alla-vostra-home-mosaic-transparent-after-polygons.png - added the Step 5 cropped 1440 x 1280 mosaic detail that preserves the cutting-board and salami edge while removing the lower cream/text/cart content.
- public/images/products\_overlay\_piccola\_large.png - reused the existing Piccola products overlay as the Step 6 During Shopping screenshot source; the file matched the Alla Vostra raw Android\_Large/products\_overlay.png source exactly and was not regenerated.
- portfolio\_PROJECT\_SNAPSHOT.txt - regenerated to reflect the synced e219cef source state, public asset inventory, recent commit history, and new documentation context.
- portfolio\_worklog\_august12\_part1.pdf - generated this new root-level PDF worklog artifact following the existing Portfolio naming, structure, metadata, length, and local documentation conventions.

#### Follow-Up Context

- Step 4 and Step 5 intentionally share the same home-screen mosaic source family but now have different asset bounds and aspect ratios: Step 4 remains the full cropped no-frame screen at 1440 / 2713, while Step 5 is the board/salami detail crop at 1440 / 1280.
- Step 5 crop was user-approved after moving the cutoff low enough to preserve all dark-brown board shards and salami pixels. Future Step 5 edits should avoid clipping those pixels even if the transparent area is adjusted again.
- Step 6 uses the existing Piccola products overlay screenshot rather than a newly generated image. If the Alla Vostra shopping overlay changes, the portfolio source image and the Alla Vostra raw screenshot should be compared before replacing it.
- The Visual Hierarchy section now has three conceptual rows: PRE-SCROLLING, ON-SCROLLING, and DURING SHOPPING. Future additions should account for the absolute row-label placement and the

mixed large-stack plus smaller-right-column layout.

- The UI Foundations view must remain active before inspecting Visual Hierarchy DOM in browser scripts; the Alla Vostra page still defaults to UX Product Flow.
- The local Next.js workflow can continue to serve stale CSS or image output after rapid asset

and layout changes. Future visual passes should keep using cache moves/restarts and Playwright measurements when source and browser disagree.

- The Hostinger deployment path remains the GitHub Actions static-export workflow on pushes to main, publishing the out/ directory to the hostinger-deploy branch.

#### Output Artifact

- Generated: /Users/prahlin/gh/portfolio/portfolio\_worklog\_august12\_part1.pdf
- Companion sync file: /Users/prahlin/gh/portfolio/portfolio\_PROJECT\_SNAPSHOT.txt
- Source state reviewed: e219cef07 on main and origin/main.
- Naming follows the existing root-level Portfolio convention: portfolio\_worklog\_august12\_part1.pdf. The Part 1 suffix was used because the user explicitly requested August 12 Part 1.
- Next likely action: commit and push portfolio\_worklog\_august12\_part1.pdf with the refreshed snapshot when the user is ready to sync the documentation artifact.
